# Triune Falsify-Me Abstract 35

## 1. 35. Multi-Scale Coherence: Linking Cosmic and Biospheric Rhythms

We synthesize the hazard lattice, triune gravity, and EM structuring into a single thesis: coherence across scales allows cosmic rhythms to leave subtle fingerprints in planetary and biological history. This is not astrology; it is a proposal that gravitational, electromagnetic, and geometric cycles, when aligned, modulate the probability of transitions without determining specific outcomes. The claim is that statistical tests across geology, climate, and macroevolution will reveal signatures consistent with triune-driven windows.

Falsification: robust statistical re-analysis shows that all apparent periodicities are consistent with noise or local mechanisms alone.
